

2019 LATE MODEL BODY

FACT SHEET

3" Wider greenhouse allows for better driver access and provides room for a wider roll cage

Flame retardant resin used in Ultraglass greenhouse for improved safety

Cowl panel built into greenhouse for easier installation

Increased engine clearance

Common body uses 3 different noses for brand identity

Fenders can be mounted over or under the doors

Added fender clearance for increased suspension travel

Lower air dam molded in for correct aero equality

Models available: Chevrolet Camaro, Ford Mustang & Toyota Camry

- Modern styling based on the NASCAR Monster Energy Cup Series Body.
- Designed to run side by side with the current 2004 ABC body, aerodynamically equal.
- Priced comparable to current ABC body.
- Many tracks and associations have approved this body for competition and the list is growing!

CHOOSE YOUR BODY COLOR
 BLACK CHEVRON RED WHITE

The ABC Body Program was established with the sole intent of controlling the shape of the late model body in order to provide an even playing field for all competitors. This body was designed with the full intent of the program in mind.
